Typical Workflow

Time = T

Sales → Order → Produce → Deliver → Invoice → Payment

CRM → Ordering System → Production System → Accounting System

Automation can cut cycle time to: 75% - 90% T   Impact:

Automation

❖ Standard Operating Environment (SOE)

    ❖ Templates for consistency

❖ Macros to automate routine tasks

    ❖ Easy to use buttons on toolbars

❖ **Benefits:**

    ❖ More time/resources available

    ❖ Able to produce more without adding extra overheads

    ❖ Increase throughput = increase sales = increase profit

    ❖ Able to provide improved customer service (faster order fulfilment)

    ❖ Adding value for customer satisfaction and retention

    ❖ Consistent look & feel, brand image

    ❖ Minimise errors

About ATI-Mirage

ATI-Mirage is one of Western Australia's premier developers of people, both in business and computer training skills. We has been delivering training programs in Western Australia to SME, large organisations, and Government for over 26 years. We believe we make a positive difference to our clients' work, processes, communication and employee engagement ensuring return on investment.

In the last 20 years, we have also been providing IT Solutions to the government and corporate sector. We have successfully delivered database applications, web solutions, intranets, integration solutions and strategic IT advice. We use the PMBOK methodology to ensure that projects are well scoped and managed, thereby meeting KPIs of budget, time, specifications and quality.
